SUMMARY

Senior Software Engineer with 8+ years of experience in Java/backend engineering, enterprise platforms, microservices, databases, asynchronous processing, and AI-enabled applications. Experienced in designing scalable APIs and integrations across Adobe, Sony, Deloitte, Infosys, and TCS.

TECHNICAL SKILLS

Languages: Java, Python, SQL

Backend: Spring Boot, REST APIs, GraphQL, Microservices

Distributed Systems: Kafka, RabbitMQ, Redis, Event-Driven Architecture, Asynchronous Processing

Databases: PostgreSQL, MySQL, Query Optimization, Indexing, Sharding, Replication

Infrastructure: Docker, Kubernetes, Maven, Gradle, Git, CI/CD

AI: GenAI, LLM Integrations, Prompt Engineering

PROFESSIONAL EXPERIENCE

Sr. Software Engineer

Apr 2026 – Jul 2026

Sony India

Bengaluru, India

- Spearheaded migration of a legacy monolith toward event-driven, headless microservices using Java, Spring Boot, and REST APIs across 20+ enterprise product lines.
- Designed multi-tenant backend services for high-concurrency workloads, optimizing JSON payloads to reduce end-user latency by 35%.
- Integrated Redis caching and Kafka messaging to decouple request processing from downstream workloads and improve scalability and fault tolerance.

Senior Developer

May 2024 – Jan 2026

Adobe Systems India

Bengaluru, India

- Built enterprise solutions across AEM Sites, AEM Assets, Universal Editor, Adobe Target, and Adobe cloud services for customer-facing demos and production-oriented integrations.
- Developed a Universal Editor extension integrating Adobe Firefly Services to generate images from prompts and replace selected content assets.
- Built AI-powered AEM workflows that generated image renditions from folder metadata and prompts and uploaded assets through AEM Assets APIs, reducing production turnaround time by over 80%.
- Developed reusable REST/GraphQL integration patterns and personalization frameworks using Adobe Target, Experience Fragments, and Content Fragments across 4+ enterprise environments.

Senior Consultant

Sep 2022 – May 2024

Deloitte Touche Tohmatsu India

Bengaluru, India

- Developed asynchronous Java backend services and event triggers for automated data lifecycle management, reducing manual audit overhead.
- Optimized PostgreSQL schemas and database access using connection pooling to support high-concurrency enterprise batch workloads.
- Containerized microservices with Docker and Kubernetes and integrated automated CI/CD pipelines for reliable production releases.

Senior Associate Consultant

Nov 2019 – Aug 2022

Infosys Pvt. Ltd.

Bengaluru, India

- Engineered Java and Spring Boot backend microservices with RESTful integrations for enterprise healthcare data platforms.
- Applied GoF design patterns, unit testing, and structured code reviews across a 6-engineer team to improve maintainability and code quality.
- Investigated production issues across application, integration, and database layers and delivered fixes for enterprise systems.

System Engineer

Sep 2017 – Nov 2019

Tata Consultancy Services

Bengaluru, India

- Optimized mission-critical financial backend systems through SQL query tuning, index optimization, and execution-plan analysis.
- Performed root-cause analysis of production incidents and resolved complex change requests and critical defects while maintaining 99.9% system availability.

EDUCATION

B.Tech in Electronics & Communication Engineering

2013 – 2017

University of Allahabad, Prayagraj, India
